Donna,

Here is the response from Trey Driscoll of Dudek regarding the definition of a "wind day."

Thanks,

Subject: RE: Soitec Solar - Wind days

A wind day is when the daily average wind speed exceeds 15 miles per hour (mph). Additional water demand for dust suppression was allocated for wind days.

Cheers,
Trey

Trey and Megan,

Please let me know if a “wind day” with regard to water demand for the Soitec projects, is considered a day when wind is over 15 mph. This appears to be what is indicated by footnote 3 in Table 1-6.

Thank you,
